

WHERE CAN I FIND WIRING SCHEMATICS?

Last Modified on 27/05/2026 9:21 am PDT

Wiring schematics for most VMAC products can be found in the Installation Manuals.

Go to <https://www.vmacair.com/support/manuals>. Enter the first 7 characters of your VMAC system ID and click on the link to the installation manual.

For Multifunction Power Systems, go to <https://www.vmacair.com/electrical-schematics> and select the link based on the type of weld control box you have and model number of the Multifunction.
